

# Norfolk Island Airport Pavement Resurfacing

## *Project Questions and Answers*

### ***When will the first Barge arrive at Norfolk and what will it be bringing?***

The barge arrived Tuesday, 15 October 2019. The first shipment includes asphalt manufacturing and placement equipment, bitumen containers, ground lighting components, container moving equipment, transportation equipment and items specifically for Airport such as the refueller, pallet loader, the NIRC emulsion sprayer, along with some 'new' trucks and truck bodies for Island based contractors.

Should weather conditions remain stable, unloading is expected to commence Wednesday, 16 October and will take an estimated 48-72hrs.

For safety reasons Marsh's Road access will not be open to members of the public while the unloading is being undertaken.
