THE ADMINISTRATION OF NORFOLK ISLAND

Expressions of Interest: Community Representatives for Natural Heritage Trust Projects Advisory Panel

Expressions of Interest are sought from members of the community who would like to participate in the Advisory Panel on Natural Heritage Trust funded projects currently being undertaken on Norfolk Island. The panel will have a key role in advising officers of the Administration and the Commonwealth on the management of NHT grants on the Island.

Current NHT funded projects include: provision of infrastructure for the future management of Norfolk Island's municipal waste stream; hydrology and water quality research; revegetation of reserves and development of a Natural Resource Management Plan for Norfolk Island.

We are currently looking for two individuals who would like to help guide the future management of Norfolk Island's unique environment. If you are interested, please contact Peter Davidson, Executive Director Environment and Infrastructure, by e-mail: feathers@admin.gov.nf or by phone on 23453.
