

## **MEDIA RELEASE**

### *Contact tracing capability testing*

A test of contact tracing capability will be occurring next week and some local businesses may be required to provide their contract tracing registers to EMNI for this purpose. Do not be alarmed if you hear about EMNI requesting these registers as there are no known or suspected cases of COVID-19 currently on Norfolk Island.

### *QR Code Contactless Check In*

EMNI are currently investigating the possibility of introducing QR code contactless check in for local businesses when 4G is available on Norfolk Island (anticipated to 'go live' on 12 January 2021).

### *Quarantine requirements for Victorian travellers*

We are still on track to remove quarantine requirements for travellers from Victoria on 23 November.

12 November 2020

Detective Sergeant Glenn Elder

IMT Incident Controller
